

Milestone 2b

1. What tasks has each group member been assigned to for Milestone2.

Will

- Install / configure test suite and write outline of tests for Project: For all functions laid out in the milestone spec; addition, multiplication, subtraction, division, power, negation, exponential, trig functions: sine, cosine, tangent
- Make sure tests are triggered using TravisCI

Xiaoxuan

- Coding on Implementation (FADiff.py)
- Proposal on future features

Gerald

- Coding on Implementation (ElemDerivs.py)
- Documentation updates (How to Use, Software Organization)
- Requirements.txt

Elaine

- Coding on Implementation (FADiff.py)
- Documentation updates (Implementation Details)

2. What has each group member done since the submission of Milestone1.

Gerald: Attended all meetings; Researched and planned how to accomplish Milestone 2 with our TA, at office hours, and on Piazza with the team; Worked on Milestone 2 deliverables jointly with all team members.

Xiaoxuan: Attended all meetings, researched and discussed how to address TA comments. Shared and collaborated with the team to move forward with Milestone 2.

Elaine: Attended all meetings, researched alternative implementations, discussed implementation plan with team members, documented team list of remaining tasks for Milestone 2.

Will: Attended all meetings, researched test suite, developed test plan, discussed implementation plan with team members.
